ATT-AudioText Telecomm

innovation

Since 1995, ATT-AudioText Telecom AG has developed customized alerting, voice mail, computer telephony integration (CTI) and interactive voice response (IVR) solutions. Strong technology partnerships enable ATT to offer unique support to businesses and their end users, from consulting to support and maintenance. The Alarm Management Server (AMX) centralizes event processing for external sources, such as building/process control, fire alarm, network management and nurse call, and notifies the alarm organization using different communication media like SMS, telephone call (VoIP), email, SNMP traps, paging or text messages on cordless handsets (DECT/WLAN) and smartphones via data push notification services.
