ATT-AudioText Telecom Solution Now Rated "Avaya Compliant"

- *AMX-Alarm Management application is compatible with Avaya Aura® Communication Manager*

FOR IMMEDIATE RELEASE: Thursday, 21 April 2011

Zürich, Switzerland — ATT-AudioText Telecom, a leading provider of Alarm Management solutions today announced that its AMX Alarm Management Server is compliant with strategic IP telephony solutions from Avaya Inc., a global leader in business collaboration systems, software and services.

The AMX Alarm Management Server helps businesses to organize their security needs and monitor the whole centralized infrastructure. The application now is compliance-tested by Avaya for compatibility with Avaya Aura ® Communication Manager 5.2.1.

Using standardized interfaces, the AMX communicates with fire alarm systems, building and process control systems, check-in and check-out systems, and monitors network management and nurse call systems. In this way, the AMX offers central recording and processing for all occurring events. Thanks to its flexible programming, the AMX is tailored to the available infrastructure and existing customer processes. The AMX Alarm Management Server ensures that the right persons can intervene on site as early as possible to prevent greater damage. All hardware and software is made of standard components, which simplifies support and guarantees a high level of investment protection.

ATT-AudioText Telecom is a member of the Avaya DevConnect program—an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company's investment in its network.

As a Gold member of the program, ATT-AudioText Telecom is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab. There, a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so ensures businesses can confidently add best-in-class capabilities to their network without having to replace their existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

About Avaya
Avaya is a global leader in business communications and collaboration, providing unified communications, contact centers, data solutions and related services to organizations of all sizes around the world.
