**Successful cooperation of AudioText Telecom and Mitel**

Since 1995, AudioText Telecom AG (ATT), based in Glattbrugg/Zurich, has been offering tailor-made alarm solutions for a wide range of industries throughout Switzerland and internationally. Using different packages, solutions can be provided to both SMEs and large corporations and, with the "Swiss Made" products, they always ensure a reliable alerting in emergency situations.

Mitel has been the leading provider of solutions for Unified Communications & Collaborations for 45 years. As a long-standing technology partner, Mitel relies on the AMX alarm server from ATT and can thus bundle various requirements and needs into one solution and successfully place systems with the end customer.

For smooth cooperation, support for all PBX systems from Mitel is guaranteed by ATT. Due to the long-standing business relationship between ATT and Mitel, the most varied projects with functions such as evacuation, localization, dead man (function), DECT-SMS and many more have been implemented.

Mr Werner Hingerl
Managing Director at Mitel Austria &
Central South Eastern Europe, Turkey &
Israel

Mitel is the global market leader for business communication. With its cloud products, and next-generation collaboration and enterprise communications applications, it delivers more than 2 billion business connections every day.

With more than 70 million users in almost 100 countries, Mitel is the only company that is fully committed to provide customers with individual future-proof communications solutions.

Our joint alerting solution ensures a fast communication flow, monitors systems and processes, triggers alarms and organizes the fastest possible assistance. This means that the requirements of hospitals/clinics and nursing homes, as well as of industry, trade and the public sector, can be perfectly covered.

The long-standing technology partnership with **Mitel** enables **ATT** to provide competent support for the implementation partners and their end customers, beginning with consulting and concept development up to support and maintenance of the delivered turnkey alarm server solutions.

You too can rely on this partnership!
